RE: Project Walk-Thru - 2019 Utility Reconstruction & 2019 Concrete Paving Project for
Evergreen Drive

Dear Property Owner, Resident and Business Owners:

The Village of Little Chute has awarded the 2019 Utility Reconstruction Project to Donald Hietpas & Sons, Inc. of Little Chute, Wisconsin and the 2019 Concrete Paving Project to Vinton Construction Company of Manitowoc, Wisconsin. There will also be other subcontractors working at various times during the project duration.

Construction is expected to start in the near future (June 17th). Donald Hietpas & Sons Inc. will distribute "Start of Construction" letters to your door or place of business prior to beginning work. The Village will also be holding an onsite meeting as listed below to address any remaining concerns that you may have. Staff will meet with residents starting at the intersection of Evergreen Dr. and Cherryvale Ave. to listen to your comments and answer any remaining questions that you may have as we walk/drive the length of the project. Depending on traffic volume we may have to meet at driveway openings to remain safe during this site visit. Village staff will also have a set of the Construction Plans to illustrate the work to be completed.

The Informational Walk/Drive -Thru Meeting is scheduled as follows:

Date: Wednesday, June 12th, 2019
Time: 6:30 p.m. – 7:30 p.m.
Location: Intersection of Evergreen Dr. and Cherryvale Ave.

Reconstruction of a street is inconvenient at times and there may be occasional delays. Please note that project driveway access for commercial properties will be limited at various times for concrete placement and curing. Gapping is a common practice for commercial driveways to maintain access of at least half of a driveway apron. Village staff and the Contractor will be in contact prior to this work to allow for additional coordination with property owners and residents who live within the project area.

Business Owners, Residents and Property Owners are encouraged to attend the on-site meeting, to address any questions or concerns. If you are unable to attend or if you have any questions, please do not hesitate to contact the Engineering Department at (920) 423-3865. Thank you in advance for your understanding and cooperation throughout the duration of the project.

Christopher L. Murawski, P.E.

Christopher L. Murawski
